

ENVY LAWN™

Always Green with Envy

ENVYWEAR™ | VIBRANT, COLORFUL, ENDURING

Keeping synthetic grass looking as good as the day it was put in can be a challenge. However, with EnvyWear that challenge has a solution. High foot traffic areas where children play, such as at the bottom of a slide, under a seesaw, swings - all see a lot of wear over short periods of time. Instead of ripping out the exhausted and surrounding turf after a short while, have EnvyWear's smaller segments strategically placed to keep the look of beautiful grass longer. Enjoy the view of giggling children running to and fro, all the while keeping what's underfoot looking newer for longer than before.

Key Benefits of EnvyWear™

- Environmentally friendly
- ADA Compliant
- IPEMA Certified
- 12 Different Colors
